Hi Dan,

Would you have some time to talk this week? I should be in most this week but I am out next week. I am just stepping out for today, though so anytime Wed-Fri. would work.

Thanks,

Jim

Hi Jim

I'm heading up an ecological risk assessment for the Cement Creek/Upper Animas River. Specifically, we are focusing on the extent of potential impacts to the fishery from the mining in Silverton. The work your agency has done in the past suggests that the effects are fairly significant and both in magnitude and extent. I was wondering if you had some time discuss the site and Parks and Wildlife plans for the future this week or next?

Please give me a ring or send me an email when you get a chance.

Sincerely,

Dan Wall, PhD

Will do Mike. I'll send something in the next couple of days.

The person who runs the fisheries for DPW is Jim White in the Durango office. I cc'd him on the email.

Hi Peter: if possible, could you, or others in the Stakeholder Group forward to EPA any topics of questions you have that we should be prepared to cover before the Jan/ ARSG meeting?

Also, do you know the contacts for Parks and Wildlife who have done the fish shocking in the past on the Animas?

Thanks,

Mike Holmes
